

# Research European Council – Falcon Project Horizon 2020 Maximization of the impact of the project

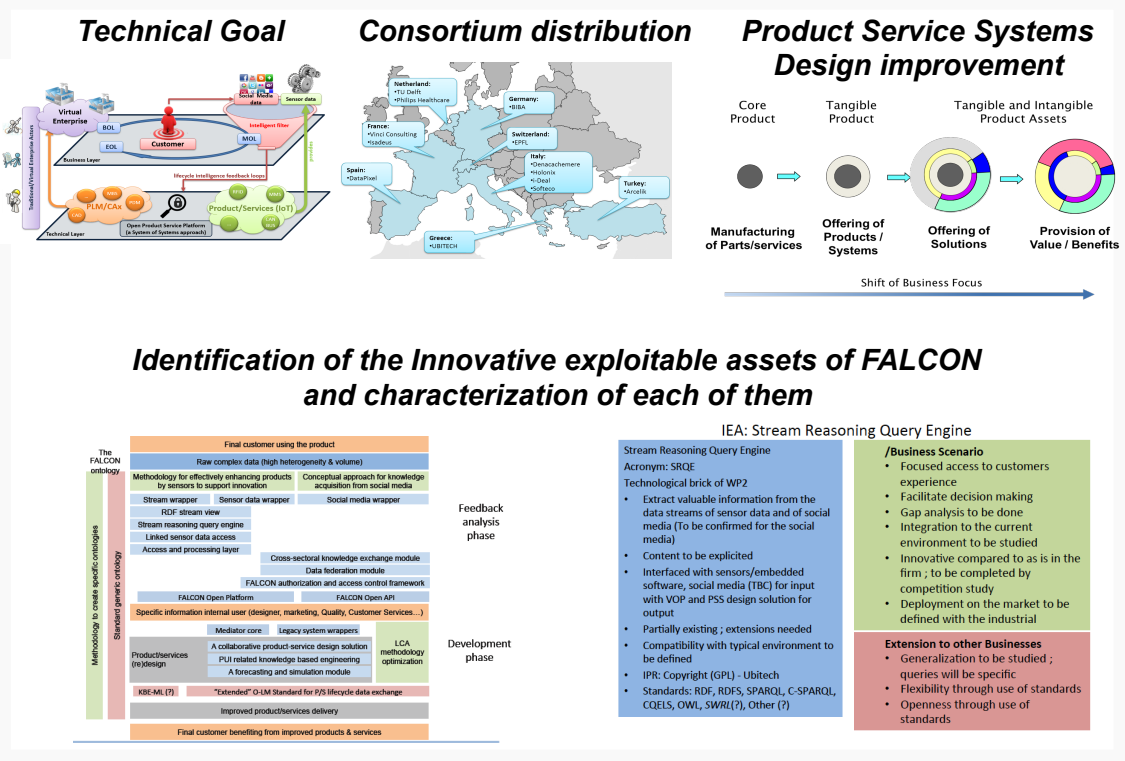

## Context and need

The FALCON project envisions to provide a framework to enable the realization of new products and value-adding services, resulting from user-experiences and product and related services usage.

The contribution of ISADEUS is twofold

- Methodology to build-up ontologies for FALCON and to support the industrial use cases,
- Maximize the impact of the project by managing the Innovation assets of FALCON from the beginning of the project

## Results (Mission from January 2015 to December 2017)

### Currently

- Alignment of the partners thanks to collaborative workshops
- Mapping and characterization of the innovative assets
- Identification of the key standards for the deployment of FALCON outcome
